# Chaewan Woo

Year of Birth : 1995.02.22
Location : South Korea, Gyeonggi-do, Suwon-si, Gwanggyo
Contact : 82-10-8624-3133
Email : chaewan2002@naver.com
LinkedIn : linkedin.com/in/chaewan-woo-2b4705307
Github : github.com/Woo95
Devhub : woo95.github.io/Devhub
Flexibility : Open to Relocate/Remote

## EDUCATION

**George Brown College** Toronto, ON
*Ontario College Advanced Diploma: Game Programming* *Sep. 2021 – May. 2024*

- Consistently on the Dean's List every semester.
- Graduated with Honors, earning 3.98/4.0 GPA.
- Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Game Physics, Game Engines, 3D Graphics & Rendering, Multiplayer Systems, Mobile & Console Development.

**University of Toronto** Toronto, ON
*Bachelor of Science: Computer Science, Mathematics & Statistics* *Sep. 2018 – April. 2020,*
*Sep. 2013 – April. 2015*

- Pursued formal game programming education in my fourth year through a college program.
- Relevant Coursework: Computer Programming, Calculus, Linear Algebra, Probability & Statistics.

**Niagara Christian Community of Schools** Fort Erie, ON
*Sep. 2009 – April. 2013*

- Recognized on the Honour Roll every year from Grade 9 to Grade 12.

**Bayview Middle School** Toronto, ON
*Sep. 2008 – April. 2009*

- Transferred to Canadian middle school after completing Grade 7 in South Korea.

## SKILLS

**Programming Languages**: C, C++, C#, Python
**Game Engines**: Unreal, Unity
**Graphics API**: SDL2, OpenGL, DirectX
**Tools & Version Control**: Git, Perforce
**Languages**: English, Korean

## PROJECTS | https://woo95.github.io/Devhub/

**George Brown College** | *Unreal, Unity, C++, C#, SDL2, OpenGL, DirectX, Swift* *Sep. 2021 – May. 2024*

- Developed multiple 2D and 3D games across various genres using Unreal and Unity engines.
- Conducted exploratory projects using SDL2, OpenGL, DirectX, and Swift to gain hands-on familiarity with graphics libraries and platform-specific programming.
- Mentored and tutored junior students in the Game Programming program upon faculty recommendation.
- Served as programming lead in team-based projects with game art and design students; all productions received A++ evaluations.

**Self-Made Game Framework** | *SDL2, C++* *Sep. 2024 – April. 2025*

- Built a custom 2D game framework in C++ using SDL2.
- Implemented core systems including ECS, sprite rendering, and a modular UI widget system.
- Integrated memory pooling and quad tree collision detection for performance optimization.

**Italian Brainrot Survivor** | *SDL2, C++* *June. 2025 – Present*

- Developed a fast-paced, real-time action game inspired by Vampire Survivors.
- Designed enemy waves, player abilities, and progression systems designed for high replayability.
- Built entirely using a self-made C++/SDL2 game framework.

## Competitive Gaming Achievements

*Recognized and **invited by multiple pro teams** in Apex Legends, I bring practical balancing instincts, deep mechanical insight, and a developer's perspective on strategic systems and gameplay structure.*

- Apex Legends: **Top1** (KR region)
- Apex Legends: **Top31** (Global region)
- Overwatch 1: **Top200** (NA region)
- PUBG: **Top50** (NA Region)
- CS:GO: **Global Elite** (Highest tier)
- Propnight: **Master 1** (Highest tier)
